# INVESTMENT OBJECTIVE

The **USAA World Growth Fund** (the “Fund”) seeks capital appreciation.

# FEES AND EXPENSES

The tables below describe the fees and expenses that you may pay, directly and indirectly, to invest in the Fund. The annual fund operating expenses for the Fund Shares, Institutional Shares, and Adviser Shares are based on expenses incurred during the Fund’s most recently completed fiscal year.

<sup>(a)</sup>Victory Capital Management Inc. (the “Adviser”) has agreed that no performance adjustment (positive or negative) will be made to the amount payable to the Adviser from July 1, 2019, through June 30, 2020. Thereafter, the management fee may fluctuate based on the Fund’s performance relative to a securities market index. See **Fund Management** section for a description of the performance adjustment.

<sup>(b)</sup>The Adviser has contractually agreed to waive its management fee and/or reimburse expenses so that the total annual operating expenses (excluding certain items such as interest, taxes, and brokerage commissions) do not exceed 1.09% of the Fund Shares, 1.00% of the Institutional Shares, and 1.35% of the Adviser Shares, through at least June 30, 2021. The Adviser is permitted to recoup advisory fees waived and expenses reimbursed for up to three years after the fiscal year in which the waiver or reimbursement took place, subject to the lesser of any operating expense limits in effect at the time of: (a) the original waiver or expense reimbursement; or (b) the recoupment, after giving effect to the recoupment amount. The amount of any waivers or reimbursements and the amount of any recoupment is calculated without regard to the impact of any performance adjustment to the Fund’s management fee. This agreement may only be terminated by the Fund’s Board of Trustees.

## Example

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. Although your actual costs may be higher or lower, you would pay the following expenses on a \$10,000 investment, assuming (1) a 5% annual return, (2) the Fund’s operating expenses remain the same, (3) you redeem all of your shares at the end of the periods shown, and (4) the expense limitation

agreement for each class of shares is not continued beyond its expiration date.

	1 Year	3 Years	5 Years	10 Years
<b>Fund Shares</b>	\$111	\$347	\$601	\$1,329
<b>Inst. Shares</b>	\$102	\$333	\$593	\$1,334
<b>Adviser Shares</b>	\$137	\$442	\$779	\$1,729

## Portfolio Turnover

The Fund pays transaction costs, including commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when shares of the Fund are held in a taxable account. These costs, which are not reflected in the Annual Fund Operating Expenses or in the Example, affect the Fund’s performance.

For the most recent fiscal year, the Fund’s portfolio turnover rate was 8% of the average value of its whole portfolio.

# PRINCIPAL INVESTMENT STRATEGY

The Fund’s principal investment strategy is to invest its assets primarily in equity securities of both foreign (including emerging markets) and domestic issuers. The “equity securities” in which the Fund principally invests are common stocks, depositary receipts, preferred stocks, securities convertible into common stocks, and securities that carry the right to buy common stocks.

While the Fund may invest in securities of companies of any size, it generally focuses on securities of companies with large market capitalizations. The Fund normally will invest its assets in investments that are tied economically to a number of countries throughout the world. However, the Fund may invest a significant percentage of its assets in securities of issuers in a single country, a small number of countries, or a particular geographic region.

The Fund uses a combination of quantitative analysis as well as an active bottom-up investment approach to buying and selling investments. A quantitative process is used to systematically evaluate an issuer’s valuation, price and earnings momentum, earnings quality, and other factors also may be considered. Investments are also selected based on fundamental analysis of individual issuers and their potential in light of their financial condition and market, economic, political, and regulatory conditions. Factors considered may include analysis of an issuer’s earnings, cash flows, competitive position, and management ability.

# PRINCIPAL RISKS

Any investment involves risk, and there is no assurance that the Fund’s objective will be achieved. The Fund is actively managed and the investment techniques and risk analyses used by the Fund’s manager(s) may not produce the desired results. As you consider an investment in the Fund, you also should take into account your tolerance for the daily fluctuations of the financial markets and whether you can afford to leave your money in the Fund for long periods of time to ride out down

periods. As with other mutual funds, losing money is a risk of investing in the Fund.

The equity securities in the Fund’s portfolio are subject to stock market risk. A company’s stock price in general may decline over short or even extended periods, regardless of the success or failure of the company’s operations. Stock markets tend to run in cycles, with periods when stock prices generally go up and periods when stock prices generally go down. Equity securities tend to be more volatile than debt securities. In addition, to the extent the Fund invests in foreign securities, there is a possibility that the value of the Fund’s investments in foreign securities will decrease because of unique risks, such as currency exchange-rate fluctuations; foreign market illiquidity; emerging market risk; increased price volatility; uncertain political conditions; exchange control regulations; foreign ownership limits; different accounting, reporting, and disclosure requirements; difficulties in obtaining legal judgments; and foreign withholding taxes. These risks are particularly heightened in this Fund because investments in emerging-market countries generally are more volatile than investments in developed markets. Emerging-market countries are less economically diverse and mature than more developed countries and tend to be politically less stable.

The Fund’s performance could be closely tied to the market, currency, economic, political, regulatory, geopolitical, or other conditions and developments in the countries or regions in which the Fund invests. As such, the Fund’s performance could be more volatile than the performance of more geographically diversified funds.

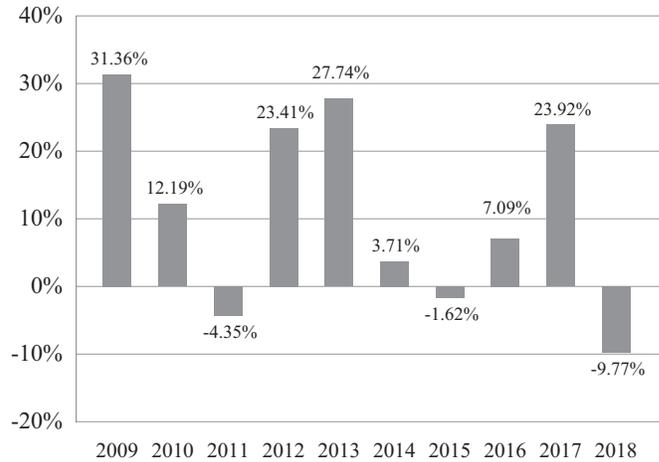

An investment in the Fund is not a deposit in a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

## PERFORMANCE

The following bar chart and table are intended to help you understand the risks of investing in the Fund. The Fund has three classes of shares: Fund Shares, Institutional Shares, and Adviser Shares. The bar chart provides some indication of the risks of investing in the Fund and illustrates the Fund Shares class’s volatility by showing how performance has varied from year to year for each full calendar year over the past 10 years. The table shows how the average annual total returns of the share classes for the periods indicated compared to those of the Fund’s benchmark index and an additional index of funds with similar investment objectives. Performance reflects any expense limitations in effect during the periods shown.

Performance data for the classes varies based on differences in their fee and expense structures. Remember, historical performance (before and after taxes) does not necessarily indicate what will happen in the future. For the Fund’s most current performance information, log on to [usaa.com](http://usaa.com) or call (800) 235-8396.

**RISK/RETURN BAR CHART**  
**Annual Returns for Periods Ended December 31**

During the periods shown in the chart:	Returns	Quarter ended
Highest Quarter Return	19.17%	June 30, 2009
Lowest Quarter Return	-18.02%	September 30, 2011
Year-to-Date Return	20.87%	June 30, 2019

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. In certain situations, the return after taxes on distributions and sale of fund shares may be higher than the other return amounts. A higher after-tax return may result when a capital loss occurs upon redemption and translates into an assumed tax deduction that benefits the shareholder. The actual after-tax returns depend on your tax situation and may differ from those shown. If you hold your shares through a tax-deferred arrangement, such as an individual retirement account (“IRA”) or 401(k) plan, the after-tax returns shown in the table are not relevant to you. Please note that after-tax returns are shown only for the Fund Shares and may differ for each share class.
